Welcome to D Zambelis

D Zambelis have been going strong within the stone industry since 1996 and is still expanding.

Having been working within the stone industry for over 25 years D Zambelis is constantly expanding. We believe that the combination of both technical experience in materials and tooling, with excellent customer service is the key to our success.

We are on hand to assist you, whether it is queries related to a product, technical support, or administrative. Simply call, email or WhatsApp us, and our friendly and informative team will take it from there.

We sell a wide selection of products, including diamond cutting, grinding & drilling tools, polishing diamond & abrasive tools, chemicals, glues & waxes, power tools, stone handling tools and CNC tools. We have one of the largest stocks of core drills for stone in the country from 6mm to 120mm.

We sell and deliver to anywhere in the UK and Ireland, and can guarantee, for UK customers, that your products will be delivered within the next day.

For over 10 years, D Zambelis has been involved in agencies for machinery, covering all aspects of fabrication. We are the agents for prestigious Italian manufacturers, including:

Achilli Srl - Secondary Saws and Machinery.

CMG - Edge Polishers

Dal Forno - Lifting and Handling Equipment

Giacomini Officine Meccaniche - Derrick, Bridge & Gantry Cranes

Italmecc - Water Recycling and Air Purification.

Terzago Macchine - Primary and Secondary saws

OMAG S.p.A. - 5, 6 & 7 Axis CNC Machines

Product Code: 201

SLAB TROLLEY CLAMP

Designed with self-locking jaws for manoeuvring stone slabs around the factory, or on the work site. The rubberised jaw and base protect slabs against chipping and scratching while transporting. The self-locking jaws' clamping strength is proportional to the weight of the slab, therefore the heavier the slab, the larger the clamping force. The trolley has 14" x 4" (350mm x 100mm) diameter pressurized wheels and a 5" (125mm) heavy duty swivel caster that increases stability and flexibility in narrow and on rough surfaces.

Grip range: 10 - 100mm | Loading capacity : 500kgs
Length: 670mm | Width: 563mm | Height 490mm

Product Code: 202

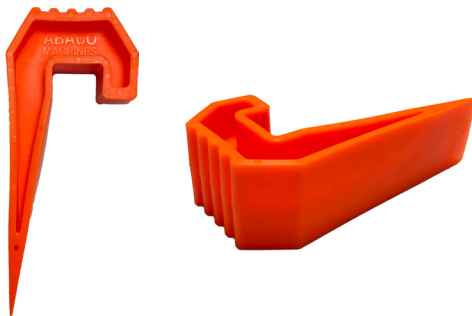

CARRY CLAMPS

They are designed for safely lifting and transporting stone slabs without using a forklift truck. The fully vulcanized rubber pads provide added grip and prevent damage to the slabs. The weight of the slab exerts a sufficient clamping force for such a simple lifting device.

Grip range 0-40mm | Dimensions : 240 x 120 x 285 mm
Lifting capacity per pair 200 kg

Product Code: 203

SLAB WEDGE

Minimise the likelihood of worker injuries while moving slabs more efficiently. The Slab Wedge can create an ideal space between the slabs to place the lifting out of the fall shadow zone. This safety tool helps promote safety in the workplace.

DEMOUNTABLE FRAME - ADF4932

The sturdy design of the Abaco Demountable Frame (ADF4932) prevents material from chipping off and keeps the finished work high off the ground.

Black rubber strips are mounted on the bottom and back support to prevent slippage. It has 4 ratchet straps to hold loads steady.

It also features 2 eyelets on the top bar and a double bar base with wide slots that fit perfectly for lifting the frame with an overhead crane or forklift truck.

It has 4 solid casters for easy moving, two manoeuvred by the pulling handle.

See the specification chart below for load capacity and dimensions.

MASTER 3500

Portable electric contouring machine

Master 3500 is a portable electric contouring machine with "WATER SYSTEM" base plate which creates a gliding water film between the machine and the slab. This system immediately eliminates the stone pieces broken whilst working without scratching the surfaces. The Master 3500 machine is built with high-quality materials chosen between the best producers of rough materials.
